Company

Metawin is a cutting-edge, multinational company specialising in online entertainment, real money gaming, and digital advertising, with a strong emphasis on blockchain and artificial intelligence. With office locations in Gibraltar, London, and Miami, we are dedicated to creating innovative and engaging products that our users will love and use repeatedly.

At Metawin, we pride ourselves on being early adopters of the latest technologies and are committed to pushing the boundaries of what is possible in the digital landscape. Our experienced and diverse team constantly strives to stay ahead of the curve, ensuring that our solutions are not only technologically advanced but also tailored to meet the ever-evolving needs of our users.

We are currently looking for talented and passionate individuals to join our rapidly growing team across our three locations. At Metawin, we value creativity, collaboration, and a forward-thinking mindset, and we provide our employees with an inspiring and supportive environment to foster growth and innovation.

By joining Metawin, you will be part of a dynamic and visionary team that is dedicated to transforming the entertainment, gaming, and digital advertising sectors. If you are excited about working on groundbreaking projects that harness the power of blockchain and artificial intelligence to shape the future of these industries, we would love to hear from you.

Together, we can redefine what's possible and create a more immersive and rewarding experience for our users. Don't miss this opportunity to be part of our pioneering journey – apply now and help us build the future at Metawin.

Role Overview

We are seeking a highly skilled and experienced Lead Front-End Developer to join our growing organisation.

As the Lead Front-End Developer, you will be responsible for heading up our front-end development team, driving the development of user-facing web applications and improving the overall user experience. You will collaborate closely with our design and development teams to constantly improve and add to our web application.

Your expertise in Vue.js, Nuxt, and other front-end technologies will be essential in translating stakeholders' visions into functional and visually appealing features.

We are excited to hear from talented and motivated individuals who are eager to join our successful team and contribute to our Web3 project. If you are passionate about front-end development, have a keen eye for detail, and thrive in a collaborative and fast-paced environment, we encourage you to apply.

Currently we are building our own NFT gaming project, and your role as the Head of Front-End will be pivotal in shaping the direction and success of this project.

Responsibilities:

- Lead and manage the front-end development team, providing technical guidance and mentorship.
- Collaborate with design and development teams to translate stakeholder requirements into user-friendly web applications and platforms.
- Develop and maintain high-quality front-end code using Vue.js, Nuxt, and other relevant technologies.
- Ensure the performance, scalability, and security of web applications.
- Optimise applications for maximum speed and responsiveness.
- Conduct code reviews and provide constructive feedback to the team members.
- Stay updated with the latest front-end development trends, tools, and best practices.
- Drive continuous improvement in front-end development processes and workflows.

- Work closely with stakeholders to understand their visions and objectives, and provide technical expertise and advice as to how to achieve them.

Required Skills & Experience:

- A minimum of 5 years of experience in front-end development, with a strong focus on JavaScript (specifically Vue.js).
- Expert knowledge and extensive experience with HTML5, CSS3, SCSS, jQuery, and JavaScript.
- Expert knowledge with Tailwind CSS for UI development.
- Proven expertise in Vue.js, with experience working on large-scale projects.
- In-depth knowledge and experience with Nuxt, preferably Nuxt 3.
- Strong understanding of REST APIs.
- Proficiency in cross-browser compatibility, usability, and accessibility design considerations.
- Familiarity with TypeScript and its application in front-end development.

Company Benefits:

- Highly competitive salary reflecting your skills and experience.
- Regular company socials and outings.
- Reward and recognition programs to acknowledge your contributions.
- Free bicycle parking to promote eco-friendly transportation options.
- 25 days of annual leave, in addition to 8 days of bank holiday.
- Free on-site fruit and hot drinks to keep you energised throughout the day.
- Free snacks, beer, and soft drinks and a PS5 in the office
